Career Objective

Motivated and detail-oriented Full Stack Python Developer with strong knowledge of Python, Django, React.js, PostgreSQL, HTML, CSS, JavaScript, and REST APIs. Seeking an opportunity to contribute to innovative web application development while enhancing technical and problem-solving skills. Eager to work in a dynamic organization where I can apply full-stack development expertise, learn emerging technologies, and drive business growth.

Technical Skills

Languages: Python, JavaScript

Frameworks: Django, Flask, React.js

Databases: MySQL, PostgreSQL, SQLite3, MongoDB

Tools & Technologies: Git, GitHub, Docker, VS Code, PyCharm

AI/ML: TensorFlow, PyTorch, NLP, Machine Learning

Web Technologies: HTML5, CSS3, Bootstrap, REST APIs

Concepts: OOP, Multithreading, Decorator, Exception Handling, Design Patterns, Agile Methodology

Education

Brahmdevdada Mane Institute of Technology (BMIT)

Bachelor of Technology – Computer Science Engineering | CGPA: 9.48/10

Solapur, Maharashtra

Sept 2021 – June 2025

English School Jr. College, Mangalwedha

Higher Secondary Certificate (HSC) – PCM

Solapur, Maharashtra

Aug 2019 – July 2021

SSVM Machnur, Mangalwedha

Secondary School Certificate (SSC)

Solapur, Maharashtra

Aug 2018 – July 2019

Professional Training

Fortune Cloud Technologies Pvt. Ltd.

Full Stack Python Development

Pune, Maharashtra

Jan 2026 – July 2026

- Designed and implemented end-to-end applications using Django and React.js.
- Developed secure, scalable RESTful APIs integrating robust back-end and front-end systems.
- Optimized database performance with advanced MySQL and PostgreSQL configurations.

Projects

Online Food Ordering App | *HTML, CSS, JavaScript, Flask* | [GitHub](#) | [Live](#)

- Developed a responsive and user-friendly food ordering web application deployed on Render.
- Implemented Flask backend for order processing and real-time menu management.
- Designed an intuitive UI for seamless customer browsing and checkout experience.

Fake News Detector | *Python, Flask, NLP, Bootstrap, JavaScript* | [GitHub](#) | [Live](#)

- Built a scalable web application for detecting fake news using Natural Language Processing.
- Trained machine learning models to classify news articles as real or fake with high accuracy.
- Integrated Flask backend with a clean Bootstrap frontend for real-time predictions.

Certifications

- **Introduction to AI** – Microsoft (Free Certification)
- **Full Stack Python Developer** – Fortune Cloud Technologies
